Intended for anyone working in an oral health setting, this webinar will highlight: reasons dentists/hygienists engage in vaccination and HPV prevention, latest developments in this area of practice, and firsthand implementation guidance on HPV prevention and vaccination. Our presenter, Dr. Rosie Wagner, is a vaccine champion and the first private practice dentist in the country to administer immunizations in her office. She is a founding member of the MA Oral HPV Prevention Taskforce, a member of BOHMAC, and the founder of the MA Organization for Dental Immunizers.
